Introduction

The District Improvement Plan (DIP) has been designed to provide schools and districts with a common planning template that addresses student learning and system needs that have been identified through the schools' Comprehensive Needs Assessment. It has also been designed to address any federal, state and locally required elements that must be contained in a School Improvement Plan.

Executive Summary

Introduction

Every school system has its own story to tell. The context in which teaching and learning takes place influences the processes and procedures by which the school system makes decisions around curriculum, instruction, and assessment. The context also impacts the way a school system stays faithful to its vision. Many factors contribute to the overall narrative such as an identification of stakeholders, a description of stakeholder engagement, the trends and issues affecting the school system, and the kinds of programs and services that a school system implements to support student learning.

 The purpose of the Executive Summary (ES) is to provide a school system with an opportunity to describe in narrative form the strengths and challenges it encounters. By doing so, the public and members of the community will have a more complete picture of how the school system perceives itself and the process of self-reflection for continuous improvement. This summary is structured for the school system to reflect on how it provides teaching and learning on a day to day basis.

Description of the School System

Describe the school system's size, community/communities, location, and changes it has experienced in the last three years. Include demographic information about the students, staff, and community at large. What unique features and challenges are associated with the community/communities the school system serves?

We are a small agricultural community in the Mid-Michigan area and we have 335 students. Over the past few years we have noticed an influx of special education students, especially students with ASD. Although we are small our students excel at a very high level. We have exceptional parent and community support for all our programming from academics, the arts and athletics.

A challenge we face due to our size is accommodating all our special education population needs. Therefore, we outsource some of our students to surrounding schools, so; they may have the best opportunity for success.

System's Purpose

Provide the school system's purpose statement and ancillary content such as mission, vision, values, and/or beliefs. Describe how the school system embodies its purpose through its program offerings and expectations for students.

Our District Mission Statement:

Beal City Schools in harmony with home and community, will educate our children in a positive learning environment that meets individual needs and goals in order that all students successfully function in an ever-changing global society.

Our Vision Statement:

Our students are excited, responsible learners who are encouraged by home, school, community and place of worship. As leaders, they are fully confident that they will graduate well prepared to meet the challenges and high expectations of the 21st century. As successful, life-long learners and productive citizens of high morals, they work to their fullest potential to make a positive difference in the community. Our children begin their discovery of knowledge in a nurturing family environment. Our schools and families work in harmony to provide a safe, supportive, and challenging learning experience. Our premier educational team enthusiastically embraces innovative teaching methods and high standards of performance. Our schools are the central point of learning. Using the latest technology, the world is truly our classroom. Our school district and community are committed to high expectations and high standards. We proactively work together to provide skills, knowledge, and resources thus ensuring a fully supportive environment for excellence in education for all stakeholders.

Belief Statements:

*We believe all children can learn

*We believe in creating independent, life-long learners

*We believe all children deserve equal opportunities and treatment

*We believe in promoting a positive self-concept

*We believe it takes a whole community to educate a child, and encourage parental involvement and participation

*We believe in ensuring a safe and positive learning environment

*We believe in encouraging

Notable Achievements and Areas of Improvement

Describe the school system's notable achievements and areas of improvement in the last three years. Additionally, describe areas for improvement that the school system is striving to achieve in the next three years.

Over the past three years we have been recognized as one of the top performing high schools in the U.S. according to US News and World Report for the years 2009 and 2010, along with being ranked 56 out of 820 High Schools in Michigan in 2011 by School Digger a Five Star rating system. For the year 2012 we were selected by TOP Schools USA as one of the top 75 schools in the state of Michigan. In the Fall of 2012 we had 3 of our 4 Varsity athletic teams compete in the state finals. With our teams who competed along with our cheerleading squad and Marching Band all the students who were in a uniform of some type achieved an impressive 3.5 GPA. We want to continue on the road to success and maintain our path towards excellence. Although we are small we provide a huge education and our students, staff, parents and community make Beal City a place to be proud of.

Improvement Plan Stakeholder Involvement

Introduction

The responses should be brief, descriptive, and appropriate for the specific section. It is recommended that the responses are written offline and then transferred into the sections below.

Improvement Planning Process

Improvement Planning Process

Describe the process used to engage a variety of stakeholders in the development of the institution's improvement plan. Include information on how stakeholders were selected and informed of their roles, and how meetings were scheduled to accommodate them.

All decisions are finalized by the District School Improvement Team, while implementation is done through the building level School Improvement process.

Describe the representations from stakeholder groups that participated in the development of the improvement plan and their responsibilities in this process.

School Board of Education members

School Administration

Building teachers

parents

students

Explain how the final improvement plan was communicated to all stakeholders, and the method and frequency in which stakeholders receive information on its progress.

Through open meetings of the District School Improvement Team, Board of Education and staff meetings.
