

THE FASTEST AND SAFEST CLASSROOM LOCKDOWN

- + FAST and SAFE classroom lockdown in under 1 second.
- + Engineered and tested to industry standards.
- + Maintains status of room as classroom when in use.
- + Code compliant, single motion egress, no special knowledge to operate.
- + Ready 24/7.
- + Safe. Designed to meet DHS recommendations for classroom lockdowns.
- + Code compliant - does not void insurance policy.
- + Even if a student presses the red button to lock out a teacher, entry is always possible.
- + Meets Americans with Disabilities Act requirements.

VS.

BARRICADE DEVICES

- Large and cumbersome, not conducive to life-threatening situations, where split seconds count. -
- Non-industry engineering and testing. -
- Changes status of room to detention when in use. Lockdowns can occur for a significant amount of time. -
- Non-code compliant, multiple-motion egress, requires special knowledge to operate. -
- Can be removed or misplaced away from door area. -
- Litigation Risks: Devices can be heavy, fall off doors, can ensnare and injure. Some devices present tripping hazards. -
- Being non-code compliant may void insurance policy. -
- Devices can be misused by students and others. -
- Does not meet Americans with Disabilities Act. Most devices could not be released by someone with a disability. -

DHS Primer

To Design Safe School Projects in Case of Terrorist Attacks and School Shootings

DHS recommends door locks:

- that can be quickly locked from inside with a simple locking mechanism, such as a button
- that can always be opened from inside for emergency egress
- that can be opened from outside with master keys

"Anybody, Anytime"

Quick Action Lockdown Cylindrical Locks Innovative Locking Systems for Enhanced Safety!

Dead bolt doors instantly and quickly and maintain 100% code compliance with these deadbolt locks. These locks function as a regular classroom lock for everyday use. When there is a need for a lockdown, pressing the red button instantly throws the deadbolt to the locked position. Used on doors with cylindrical lock openings. Interior & exterior cylinders require 2 removable cores. The red button does not affect the outside lever.
